Experience

Arise Design Agency

Full Stack Web Development

January 2021 - Present

JavaScript | React | NEXT.js | Prismic.io CMS | SASS/SCSS | HTML5

Projects were built in React/Next.js and leverage Prismic.io as a headless CMS. Scope of work included updating pages, layouts and some back end functionality. Additionally, these projects allowed me to develop single page applications, create reusable components that could be leveraged across multiple projects, practice with CSS preprocessors such as SCSS/SASS, craft digital content from mockups and build static sites using Next.js.

Experience with versioning tools such as GitHub were acquired at this position and is a necessary skill working in a collaborative environment. Always am learning more and seeking out opportunities to sharpen these skills.

Tutoring Services

Front End Web Development

August 2015 - Present

HTML5 | CSS3 | JavaScript | React

Collaborated with students to complete assignments, identify skills and improve upon weaknesses. Used positive reinforcement, repetition and review to help students master challenging material. Built projects alongside students to help cement their knowledge of the subject. Am a mentor on r/programmingbuddies offering free mentorship to anyone who needs help with the aforementioned languages. Created a Discord server to grow a community of like minds and to help each other with our programming journey.

Electric Bicycle and sUAS builds

October 2019 - Present

Building and programming race FPV quadcopters (drones) and electric bicycles is a hobby of mine. I love flying, riding, building, experimenting and programming in my free time. Specializing in lightweight micro copters and building into dedicated electric bicycle frames that can sustain high power output levels.

Yoga and Aerial Instructor

October 2014 - March 2020

Started with completing a 200 hour RYT teacher training and continued to become certified teaching Vinyasa, Hatha, Aerial and Stand up paddle board yoga. Taught classes across San Diego during prepandemic times.
